Who

we are

eyebright is a leading utilities management company based in Glasgow. Established in 2009 with the mission to change the way businesses manage their utilities. Helping clients build and implement actionable strategies to manage their infrastructure, reduce their costs and strive to achieve sustainable solutions.

Excellent relationships with more than 40 energy and water suppliers, and strategic partnerships with a range of excellent telecoms providers allow us to find the best solutions for all your utility needs.

Our advice is fully independent, and we guarantee 100% transparency on our range of services.

With all we do, we try to make your life easier, save your staff time, solve your problems with our wealth of industry knowledge and ensure that you benefit from the most competitive utility solutions available. Our proactive, end-to-end approach to managing your utilities and our market intelligence services will allow you to stay in control with minimum time commitment.
